Professional Summary

Fourth-year Information Systems Engineering student at the National University of Costa Rica with experience as a Project Coordinator and Scrum Lead. Proficient in backend development using Java, Spring Boot, and Python, complemented by a strong foundation in SQL databases like MySQL and Oracle. Actively cultivates an AI-First workflow by integrating GitHub Copilot and LLMs to accelerate development cycles and optimize code. Proven ability to collaborate in Agile teams to deliver scalable software solutions and automated testing.

Skills

- **Programming & Paradigms:** Java | JavaScript | C# (Academic/Project experience) | C++ | Python | Spring Boot | JPA / Hibernate | OOP | Functional Programming | Algorithms & Data Structures.
- **Web Development:** HTML5 | CSS3 | Angular | React | Node.js | RESTful APIs | JWT Authentication | Responsive Design | UX Heuristic Evaluation.
- **Databases & Infrastructure:** MySQL | Oracle | SQLite | SQL Queries | Database Design & Normalization | Familiarity with Cloud Infrastructure (Azure).
- **Testing & Automation:** JUnit | Selenium | Automated Browser Testing | PHPUnit | Scripting and Automation (Python) | Security Best Practices (CSRF, Hashing).
- **Collaboration & Tools:** Git | GitHub | Azure DevOps | Agile/Scrum (Scrum Lead experience) | Jira | Trello | Documentation Best Practices.
- **Core Competencies:** Strong Problem-Solving | English Communication (Oral & Written) | Team Collaboration | Continuous Learning | Results-Oriented Mindset.

Experience

Project Coordinator and Scrum Lead	<i>Museo Nacional de Costa Rica</i>	2/2025 - Current
• Coordinate a multidisciplinary team of 6 members in the development of Patrimonius, a digital preservation and document management system. • Support sprint planning, task follow-up, and team collaboration using Agile/Scrum methodologies. • Contribute to requirements analysis, documentation, and process organization to ensure high-quality deliverables. • Collaborate with the development team using technologies and tools such as Angular, MySQL, Node.js, and Azure DevOps. • Promote effective communication, teamwork, and continuous improvement throughout the project lifecycle. • Use digital and AI-assisted tools, such as GitHub Copilot, to improve productivity and consistency in project deliverables.		

Projects

Medical Appointment System – SPA Web App	<i>Universidad Nacional de Costa Rica</i>	2025
• Engineered a robust Java Spring Boot backend utilizing JPA/Hibernate for data persistence and designed optimized MySQL relational database schemas to ensure high-performance data storage, secure JWT authentication, and seamless retrieval of medical records within an Agile framework		

Education

Bachelor of Science	<i>Universidad Nacional de Costa Rica</i>	02/2022 - Present
• Information Systems Engineering
